

Security Product Hardware Recommendation List

- CPU: Pentium4 2.8 GHz or higher
- OS: Windows XP(32-bit)/Windows Vista(32-bit)/Windows 7(32-bit, 64-bit)
- RAM: 512MB or higher
- HDD: 120GB or higher
- Graphic Card: 32-bit high color SVGA graphics card with 128MB video memory and DirectDraw/ YUV Rendering Capability
- CD-RM/ DVD-RM
- Ethernet: 10/100 Base-T Ethernet card
- Sound card and speaker

Note: Based on [Intel suggestion](#), for NONE Microsoft® Windows® XP Operation Systems, Hyper-Threading must be disabled in the system BIOS Setup program ([see FAQ for procedure](#)) for our DVR products.

For the most stable security DVR, we strongly recommend NOT using VIA/SiS/ALI chipsets and SiS VGA chips with our products due to their severe limitation of the chipset design.

Note: Please make sure you are using the standalone VGA card with 128 MB memory above instead of built-in onboard VGA card in order to ensure the working stability and performance of the NV/NX series software.

Note: We highly not recommend apply Samsung Hard disk drive to SA/XR/EXR DVR product for recording or backup video files usage.

- Special CPU recommend

If you would like to use recording 640 x 480 and 30 fps(Turbo mode), Core 2 Duo E6600 CPU is basic requirement.

- Motherboard

Our products support most of the Intel Chipset motherboards. Intel 915 · 945 · 965 · 975 · P31 · P35 chipset and NVIDIA nForce4 Ultra MCP, NVIDIA nForce 570 SLI · NVIDIA nForce4 SLI Intel chipset

Note: For better performance and system stability we strongly suggest user to follow our tested brand and chipset and please refer to the validated model type as below.
