3. New Feature on S1.00.03.14.71
4. Known Issue

Scope:

Keeping your AVer VC system up to date is essential to getting the most out of its capabilities. AVer VC systems are designed to be updated via firmware. Each firmware release will offer new features, increase the functionality of your AVer VC system, and address previous issues. The underlined sections in the table below help identify which version of firmware you are currently using.

Firmware version 03.14.0071 is the first release for the **AVer HVC130** and **HVC330**

Firmware File Name	Firmware version
<u>00.03.14.0071</u>	3.14

System Requirements:

The following information is required to perform the updates.

Update Firmware via USB Flash Drive

Please follow these simple instructions to update your AVer VC system using a USB flash drive. Do not insert the USB flash drive till the AVer AVer HVC130/HVC330 has completely started up.

1. Download the firmware file from AVer's website and UNZIP then save it in the USB flash drive.
2. Power on the AVer VC system
3. Once the system has started up, insert the USB Flash drive into the USB Port of the AVer VC System.
4. The system will automatically detect and install the firmware from the USB flash drive.
5. Once the firmware update has been completed, the system will restart.
6. The firmware file in the USB flash drive will be deleted automatically once the update is completed. Do not turn off the system while the update is in progress.

New Features in S1.00.03.14.0071

The following are the new features in this release. Refer to your AVer VC product documentation for more information about using the product.

Feature	Description
Recording and Playback on HVC330 model	Support FEC(Forward error correction) feature.
