

## Teaching becomes interactive and effective with AVerVision530

The Bangkok University was originally known as the Thai Polytechnic Institute until 1965 when it became the first private college in Thailand, and its most well-known field of Bangkok University is Faculty of Communication Arts in recent years. Moreover, Bangkok University got the "MIS ASIA'S TOP 100 I.T. USERS" award in both 2004 and 2005.

*"I have not found any problems for using AVerVision530. It works properly...it is a durable and powerful tool to education. I think other teachers will like it too."*

Professor Parama Satavatin, Bangkok University

AVerVision530 makes the teaching easier and more comfortable with its easy-to-use operation and high-definition image. Educators can only put document, art work, model or magazine under the camera and display to projector. It works so fast to show the content of documents.

*"After we have AVerVision530 in class, I don't need to take much time to prepare the documents for classes because I can place the books or other documents under the camera and then start teaching."* said Professor Wuttisak Pitsuwan, lecturer of faculty of Business Administration of Marketing Department.

By the new teaching tool, now educators spend less time on preparing materials and focus more on thinking how to make teaching richer and interactive.

Professor Parama Satavatin, lecturer of faculty of Communication Arts, said,

*"I am satisfied with the quality of AVerVision530; its resolution is higher than the old one and with more space to save images. I will use FREEZE function to pause the image of document so I have a time to prepare new documents while students can take a note."*

Professors can also capture images into built-in memory and then upload to sharing folder so that students can download them for review.

Besides, AVerVision530 increase interaction in class. Students will do assignments by AVerVision530 and present what they want to show like diagrams or charts, and share ideas to others. Professors can give advices as well.

With the attending of AVerVision530 Document Camera in class, teaching and learning becomes more effective and interactive.

*"For presentation in class, my students can use the AVerVision530 easily to present their idea. And I can know how much they understand the lesson."*

Professor Parama Satavatin, Bangkok University
