- Screen Share configuration setting and panel name change.
- Screen Share user manual update.
- Panel brightness adjustment from side bar menu.

Improvements

- Move 'User Agent Setting' selection to the top of browser menu to enable users to switch video play mode between Desktop and Mobile mode.
- Reduce side bar menu size to increase touch area.
- Remove Ads from OfficeSuite app.
- Cloud drives access from File Manager app.

Bug Fixes

- Screen Share app
 - Airplay connection drop.
 - Airplay audio issue with YouTube app.
 - Can't find panel to connect.
 - Chromecast/Miracast video stall and corruption.
 - Chromecast randomly shows black screen.
- WiFi
 - Upgrade to newer driver.
 - Connection drop / rescanning.
 - Failed to detect WiFi dongle.
- Time is out of sync on the panel after intensive video playing.
- Shown "Stop Working" message when switch between Screen Share app and External Input Source.
- Audio auto play gets lag when user keeps pressing physical button.
- Display Management application – failed to auto detect panels from the same sub-network.
- Sphere2 application - no response issue.
- Audio adjustment to avoid speaker blown out.

Known Issues:

- Sometimes Wi-Fi connection can't be established successfully.
 - We are working on the fix for next release.
 - Workaround: Retry one or two times and the connection will be established.
- Screen share does not support Apple's app-specific protocols such as Keynote.
 - This is by design of screen share app.
- Screen Share could fail if user launches Screen Share app before network connection is established on the panel.
 - We are working on the fix for next release.
 - Workaround: Wait for network connection is established on the panel before launching the app.
- When casting device and the panel are not in the same time zone, YouTube video casting will fail.
 - This is the limitation on your devices which checks the time zone in server with Google before playing YouTube video.
 - The workaround is to set your casting device and the panel to the same time zone.
- No support for Dolby stereo.
 - This is the limitation in our decoder which doesn't support Dolby sound.
- Hide the password as users are typed.
 - After updating to v44, please do factory reset to have hidden password take effect.
- Android Printing does not work in the current version.
 - This will be fixed in future release.
- Gallery media player app does not support MP4 file.
 - This is the limitation in Gallery app.
 - The workaround is to use ES media player to play MP4 video.
- Voice search does not work in Search app.
 - This is the limitation in Search app.
