

## Case Study

### AVerVision VP-1 Inspires Children at JSS International School, Dubai

JSS International School, Dubai, is a day boarding school with classes from Kindergarten to Grade 8, following the Indian Certificate of Secondary Education (ICSE) curriculum. As a learning nucleus it offers the highest quality educational programs in a nurturing and stimulating environment that fosters the potential of every student. JSS offers a well balanced and broad curriculum with emphasis on creativity and excellence through various curricular, co-curricular and sports activities. JSS encourages partnership with parents and community.

Teachers and students at JSS International School are very happy in obtaining the AVerVision VP-1. The teachers are familiar with using IT tools in teaching, such as multimedia projectors, laptops and interactive whiteboards. Thus no further training is required after embracing AVerMedia's AVerVision VP-1.

Since the arrival of the AVerVision VP-1, children are very excited about the different features this new technology offers, such as the zoom feature. "I can use this like a microscope in my class. The zoom feature gives a 3D effect in the classroom and is very interesting for the children", commented Ms. Naveeda, the Grade KG2 teacher at JSS International School.

The students are also inspired to see themselves on the big screen when discussing a lesson in class using the AVerVision VP-1. "I can see my own picture on the screen!" exclaimed Laiba, a 5-year old pupil at JSS International School. "I want to see Batman on the screen." Said Jishnu.

The reality is, at JSS International School they want the teacher to teach only with the Visualizer.

## Case Study

AVerVision VP-1 is very useful in showing books, pictures and other printed matters in class by projecting the image on a big screen.

AVerVision VP-1 was also used for showing arts and craft designs, solids like pyramids, cones and cubes, and even colors and shapes for the primary pupils.
