Overview

Q-SYS™ Designer software enables users to create designs for native Q-SYS™ Platform system and supports the integration of the greater Q-SYS™ ecosystem.

With AVer Q-SYS™ Plugin for PTZ Cameras, operating PTZ control is fast and instinctive. The preset points and the tracking control provide you smooth and effortless video conferencing and streaming experience.

System Requirements

DL30

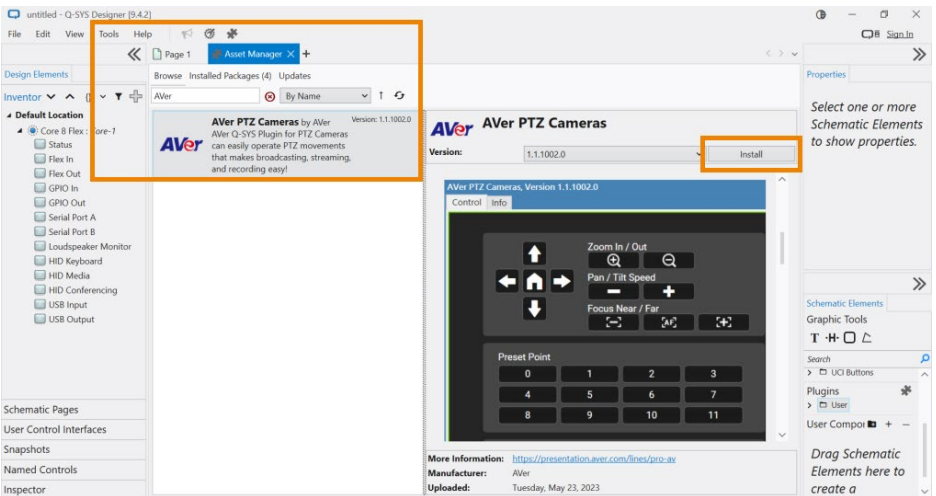

Install Q-SYS™ Designer

1. Download Q-SYS™ Designer from Q-SYS™ (<https://www.qsys.com/resources/software-and-firmware/q-sys-designer-software/>).
2. Follow the on-screen instruction to install Q-SYS™ Designer to your computer.

Install Q-SYS™ Plugin for PTZ Cameras

To install Q-SYS™ Plugin for PTZ Cameras, you can:

- **Install from Q-SYS™ Designer Asset Manager:**

1. Open Q-SYS™ Designer.
2. Click **Tools** on the menu > **Show Asset Manager**.
3. Type “**AVer**” in the searching box > select **AVer PTZ Cameras** > click **Install**.
4. PTZ Cameras plugin will appear under **Plugins** > **User** > **AVer Information**.

- **Install from your computer:**

1. Download Q-SYS™ Plugin for PTZ Cameras installer to your computer from AVer Download Center (<https://www.aver.com/download-center>).
2. Follow the on-screen instruction to install the plugin.
3. Open Q-SYS™ Designer. PTZ Cameras plugin will appear under **Plugins > User > AVer Information**.

Uninstall Q-SYS™ Plugin for PTZ Cameras

To uninstall Q-SYS™ Plugin for PTZ Cameras, you can:

- **Uninstall from Q-SYS™ Designer Asset Manager:**

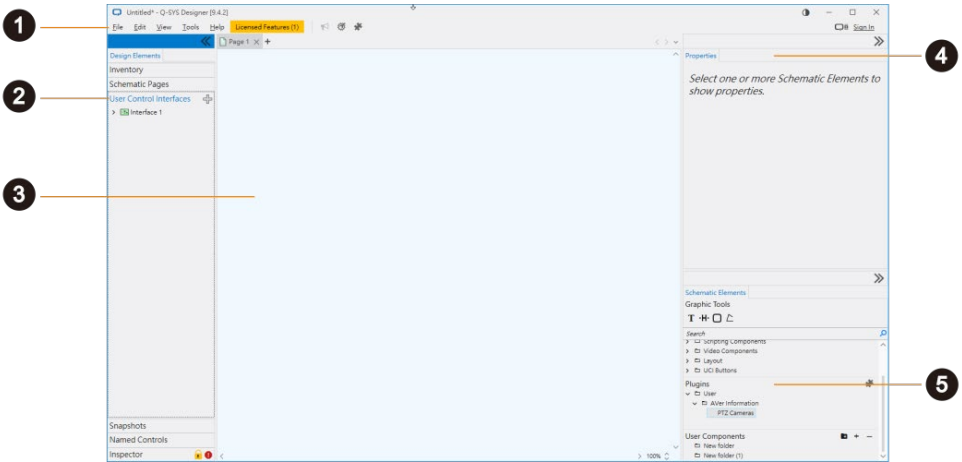

1. Open Q-SYS™ Designer.
2. Click **Tools** on the menu > **Show Asset Manager**.
3. Type “**AVER**” in the searching box > select **AVER PTZ Cameras** > click **Remove**.

- **Uninstall from your computer:**

1. Open file explorer. Enter the location for Q-SYS Plugin:
“C:\Users\[Account]\Documents\QSC\Q-SYS Designer\Plugins”.
2. Right click on the plugin and select **Delete**.

Get Started

Q-SYS™ Designer Interface

1. Menu

Provides quick access to commands and functions.

2. User Control Interfaces (UCI)

Create workspace to design and edit PTZ camera control panels.

3. The Schematic

Drag and drop files to schematic for further views and edits. You can have more than one page of schematic diagrams.

4. Properties

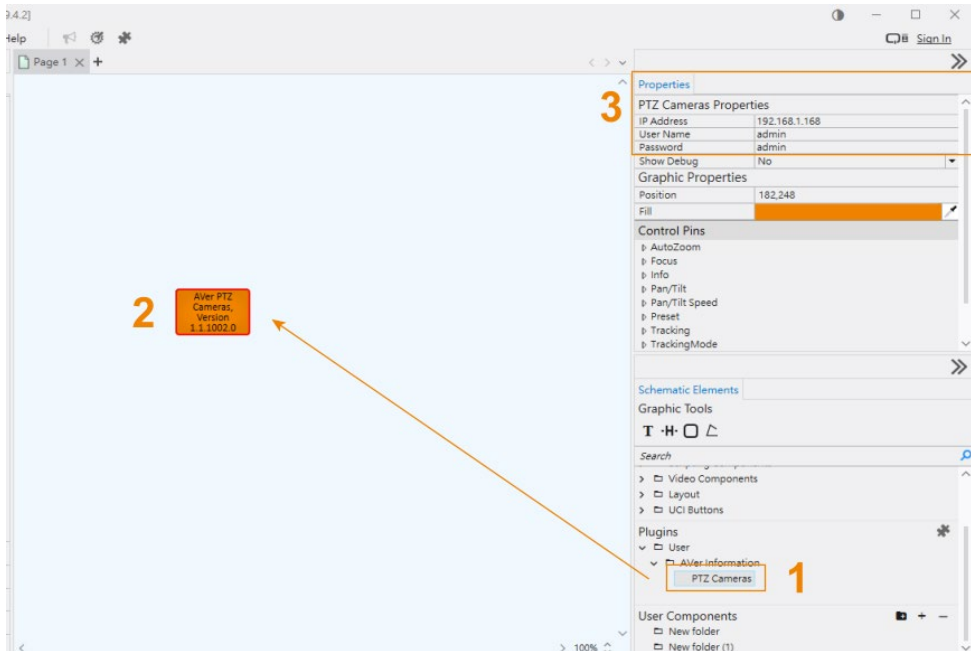

Check and edit the properties of selected components.

5. Plugins

Provides integration of licensed third-party plugins.

- **Asset Manager:** Shows plugins downloaded and installed from Asset Manager. To open Asset Manager, click the **Puzzle** icon on the menu.
- **User:** Shows user-installed plugins (with .qplugx files) and legacy plugins bundled with previous versions of Q-SYS™ Designer.

Configure Q-SYS™ Plugin for PTZ Cameras

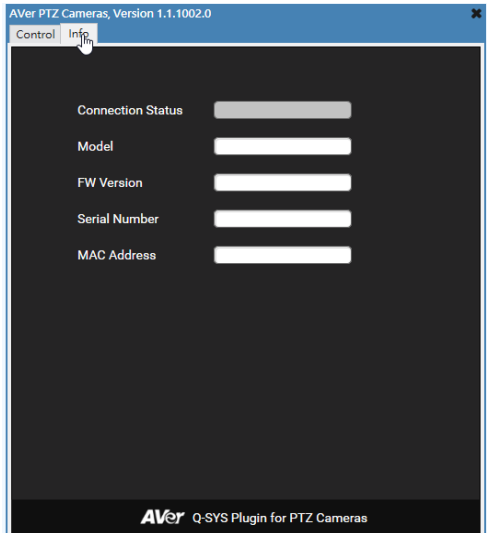

Insert Q-SYS™ Plugin for PTZ Cameras to the Schematic

1. Go to **Plugins > User > AVer Information > PTZ Cameras**.
2. Drag and drop the **PTZ Cameras** plugin to the Schematic.
3. Enter **PTZ Camera Plugin Properties** of your AVer camera.
4. Press **Enter** on your keyboard to connect.

Select Configurable Components

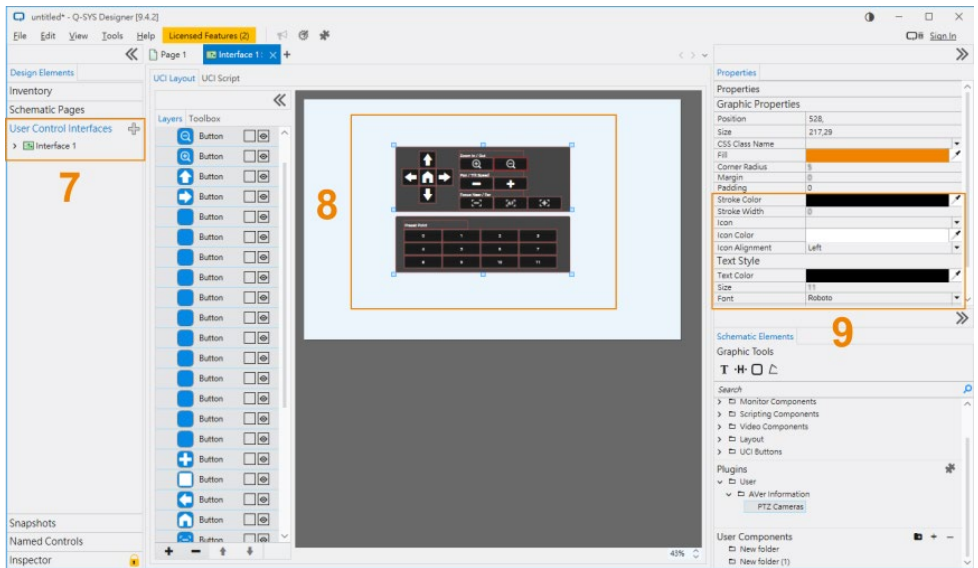

Camera Control Panel

Camera Info

5. Drag over to select the camera control panel components you want. Selected components will be in a red frame.
6. Click **Edit** on the menu > **Copy** (or **Ctrl + C** on your keyboard) to copy the selected components for later.

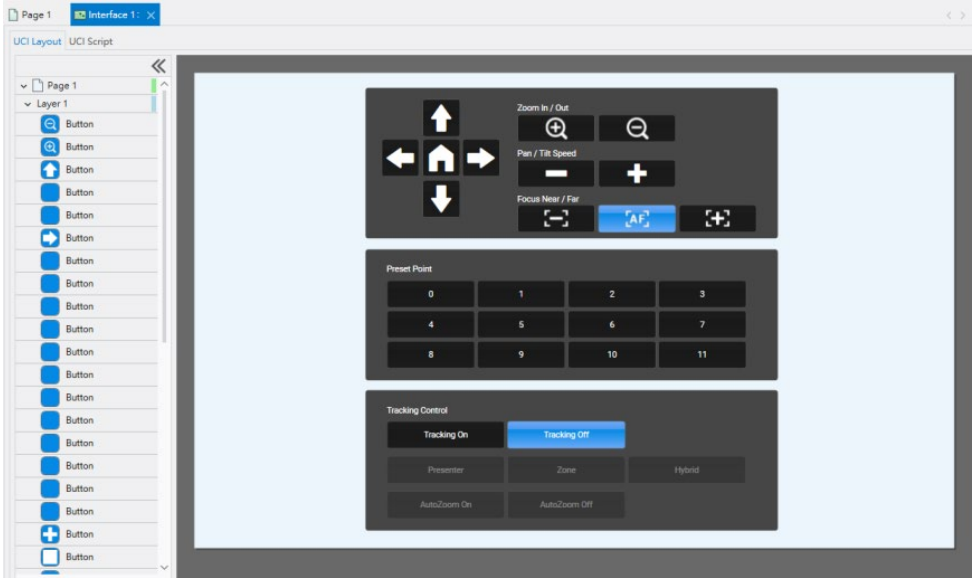

Configure Components on User Control Interfaces (UCI)

7. Click **User Control Interfaces**, then click the **Plus** icon to create a UCI.
8. Click **Edit** on the menu > **Paste** (or **Ctrl + P** on your keyboard) to paste the copied components to the Schematic.
9. To customize control panel components, you can:
 - Drag the bounding box to resize.
 - Double click the text box to rename.
 - Click the icon and change the icon color in **Properties**.
 - Right click to the open context menu for more commands.
10. To remove components, do any of the following:
 - Select the component from the Schematic or select from **Layers**, then press **Del** on your keyboard.
 - Select the component, click **Edit** on the menu > **Delete**.

Emulate Connection and Control

After customizing AVer Camera control panel components, you can run tests by emulating the connection.

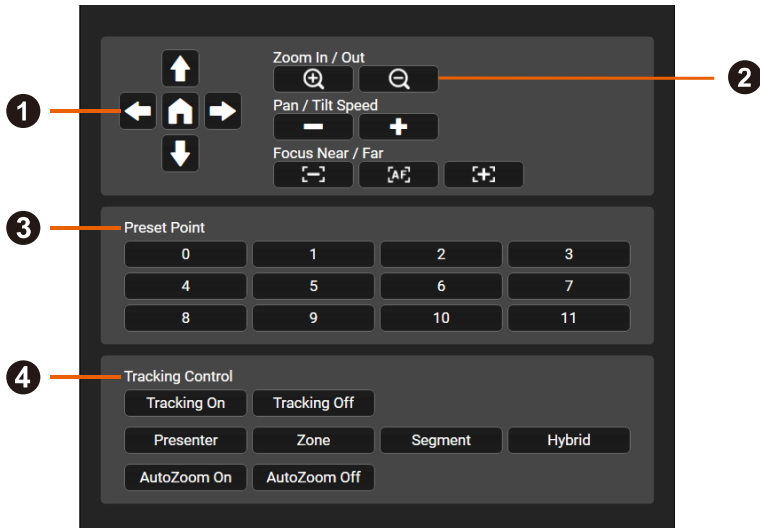

To emulate connection and control:

1. Click **File** on the menu > **Emulate**.
2. A **Design License Requirements Have Changed** pop-up window will appear. Click **OK** to continue.
3. If the connection is successful, control panel buttons will become white and clickable so you can control your PTZ camera. If not, disconnect from the emulation and make sure you have entered the correct camera information in **Properties**.

Note: You can't customize control panel components or change any settings until you disconnect from the emulation. To disconnect, click **File** on the menu > **Disconnect**.

AVer Camera Plugin Control Panel

1. Navigation/Home Buttons

Tap the **Home** button to go to the home position or reset the pan-tilt position to the center depending on the camera model.

2. Zoom, Pan-Tilt Speed and Focus Controls

3. Preset Point

Click a preset number to go to that position. Make sure you have defined the required presets on the camera web interface.

4. Tracking Control

- **Tracking:** Turn tracking on or off.
- **Mode:** Select a tracking mode to follow the presenter in real time as they move. Make sure you have configured tracking modes on the camera web interface.

Note: Tracking modes may vary depending on your AVer camera model.

Mode	Description
Presenter	Frames and follows presenter on screen.
Zone	Frames the presenter in real time as they move using up to four presets. When the presenter exits the previous preset, the camera will follow and move to the next preset.
Segment	Lets you define a detection area for each preset. When the presenter enters the detection area, the camera will move to the corresponding preset. The detection area and preset do not need to overlap, which makes it suitable for presenting information, such as on the blackboard or slides.
Hybrid	Combines Presenter Mode and Segment Mode, and lets you define a detection area for each preset. When the presenter enters the detection area, the camera will move to the corresponding preset. When the presenter leaves the detection area, the camera will frame and follow the presenter using Presenter Mode.

- **Auto Zoom:** Auto Zoom is only available in Presenter Mode and Hybrid Mode. When turned off, the zoom ratio will be based on your selected preset on the camera web interface. To select a preset from the **Auto Zoom** drop-down list, go to **Tracking Settings > Presenter** or **Hybrid** on the camera web interface.

Save to Core and Run Connection

When you finish configuring the control panel, save your design on the core processor to run connection and control AVer PTZ Cameras on devices with compatible software.

To save and run connection:

1. Open Q-SYS™ Designer.
2. Go to **File** from the menu > **Save to Core & Run**.
