Release Notes

Product Name: SA-A5 Streaming Audio System

FW Version	V 9.0.0011.12
Release Date	July 9, 2024
New Features	Support auto ducking technology
Improvements	N/A
Known Issues	In some cases, auto ducking may be ineffective, such as when ambient noise is too loud or when the microphone's volume level is lower than that of other audio sources.

FW Version	V 9.0.0009.11
Release Date	May 6, 2024
New Features	Comply with PSTI regulation (username & password)
Improvements	N/A
Known Issues	N/A

FW Version	V 9.0.0000.06
Release Date	December 27, 2023
New Features	1. Audio volume settings can now be adjusted through the web interface. 2. Device status, including wireless connection and battery status can be monitored directly on the web.
Improvements	N/A
Known Issues	**1. Random slow wireless connection** - Duration: ≤ 30 seconds - Distance: Within 3 meters - Status: Under investigation for optimization **2. Random connectivity between classrooms** [Scenario] Users forget to turn off the microphone before moving to another classroom or when two classrooms are within 3 meters without a barrier. 3. **Failed to save microphone power** when in the charging mode When out of range for 3 minutes or under mute mode for 30 minutes, the microphone will not automatically turn off.
